

## **SUSTAINABLE TOURISM POLICY**

NEARPORT HOTEL aims to meet the needs of our guests in the most efficient way with its excellent service quality. The work we have done throughout all these years has helped us gain the experience that leads us to develop today and we aimed for a more efficient operation in this context, therefore, we also participated in the sustainability efforts in line with the legal regulations and we try to reduce the negative effects that may occur during our services. Therefore, in order to ensure our commitment as a responsible company, we care about protecting our natural resources, heritage (character, traditions, culture) by obtaining the Sustainable Tourism Certificate, conveying the importance of working in this direction to our guests, and training our employees to fulfill their duties.

Our mission is a tourism operation that fully meets the needs of our guests in our region and fulfills our commitment to protect the environment, resources and culture as a sustainable service provider, prioritizing environmental, social, cultural, economic, quality, human rights, health, safety, risk and crisis issues. to ensure. Our vision is to protect our reputation and legacy of quality service and respect for the environment.

### **POLICY TO PROTECT RESOURCES AND REDUCE POLLUTION**

Environmental regulations We started our activities on four pillars: Energy saving, water saving, correct management of solid waste materials and suppliers.

1. We organized information campaigns and trainings among employees for energy saving. Using devices in low power mode. Replacing with energy-efficient equipment. Installing energy saving bulbs. Unplugging unused devices. We make the most of natural light. We provide a good lighting standard in lighting systems. We have an internal policy that includes measures to save energy.

2. We organized information campaigns and trainings among employees to save water. We monitor monthly water consumption. We have an internal policy that includes measures to conserve water.

3. We are part of the “Zero Waste” program for the proper treatment of solid waste and we have a formal waste management program that ensures solid waste is separated and officially handed over to a facility to continue recycling. We train our employees by introducing concepts, practices and policies.

4. We have a purchasing policy that gives priority to environmentally friendly products (biodegradable, reusable, recyclable). We use recycled paper whenever possible. We've created an updated list of suppliers, including eco-friendly, local, and fair-trade companies.
